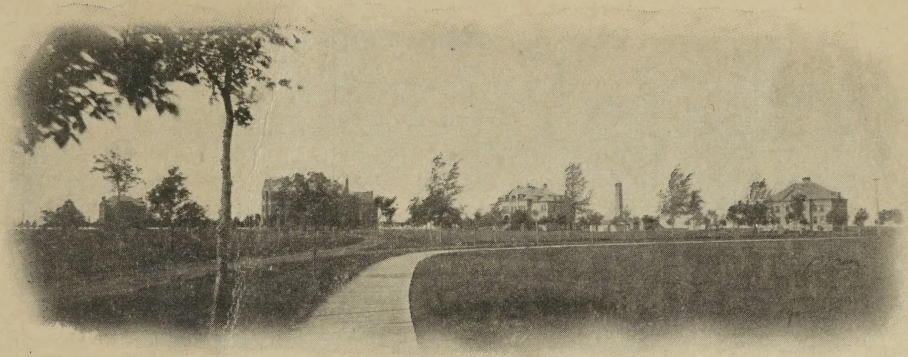
UNIVERSITY OF
NORTH DAKOTA



THE UNIVERSITY OF NORTH DAKOTA

GRAND FORKS, N. D.

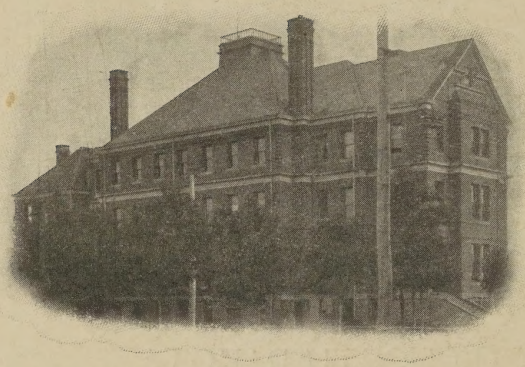
WEBSTER MERRIFIELD, M. A., *President*

AN INSTITUTION founded for the education of the young men and women of the state.
AN INSTITUTION where you may secure a LIBERAL education.
AN INSTITUTION where you may secure a PRACTICAL education.
AN INSTITUTION where you may secure a LEGAL education.
AN INSTITUTION where you may secure a TECHNICAL education.
AN INSTITUTION of the people, by the people, and for the people.

Supplement to
Bulletin of The State University of North Dakota
Vol. 1 No. 1 June 1909

THE COLLEGE OF ARTS.

GEO. S. THOMAS, PH. D., *Dean.*



MAIN RECITATION HALL.

THE courses in this department lead to the degree of Bachelor of Arts. They are similar to college courses in the best eastern colleges and in the other state universities, and are much superior to any courses offered in any other institution in the state.

Special Advantages.

The libraries and laboratories of the University are unsurpassed between Minneapolis and the coast. No young man or woman need leave the state to secure a good education. The opportunity is at hand, and it belongs to the people. North Dakotans support the University; North Dakotans ought to avail themselves of it. Any one desiring a liberal and thorough education in the arts and sciences should attend the State University.

Courses Offered.

Among the studies offered are Biology, Bacteriology, Chemistry, Physics, Mineralogy, Geology, Astronomy, History, Philosophy, Psychology, Logic, Pedagogy, Political Economy, Sociology, Mathematics, Latin, Greek, French, German, Spanish, Scandinavian, English, Elocution, Music, Drawing, Mechanical, Electrical, and Mining Engineering, Shop Work, Manual Training and Pharmacy.

For further information, send for catalogue.

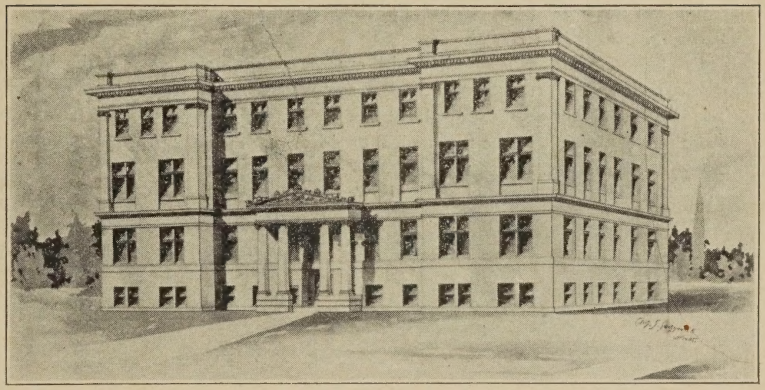
COLLEGE OF MINING ENGINEERING.

(School of Mines.)

EARLE J. BABCOCK, B. S., *Dean.*

A New Building and Equipment.

The erection of a new laboratory building has made the enlargement and development of the undernamed departments possible. In this new building are roomy and finely equipped work-shops in which can be secured practical training in the various lines of engineering. Here also are recitation and lecture rooms for the study of the theoretical part of these professions.



SCIENCE HALL.

Erected in 1901 for the three Science Departments. The Physical Department occupies the first floor, the Department of Chemistry the second, the Department of Biology the third, the Department of Mining Engineering the basement.

The School of Mines has its foundation in a grant of 40,000 acres of land set aside for the purpose by an act of Congress at the time North Dakota was admitted to the Union.

Well Trained Men Needed.

The wonderful development of the resources of this country has made the mining industry second only

26 JI '02

to that of agriculture. It is easily seen that the successful development of such resources requires special training in engineering, mining, metallurgy, chemistry, geology and other kindred sciences. With this in view the courses in the School of Mines have been arranged so as to give a thorough technical education to those desiring to become mining engineers, metallurgists, and superintendents of industries, and so as to produce men capable of developing the resources of the state.

Advantages.

The School of Mines is supplied with crushers, pulverizers, clay, coal and ore working machinery, reducing furnaces, assay furnaces and other apparatus necessary for an extended course in mining, metallurgy, etc. Students in mining engineering, have by special arrangement, the additional advantage of the instruction, shops and fine epuipment of the mechanical engineering department. The courses of instruction are thorough and the work is practical.

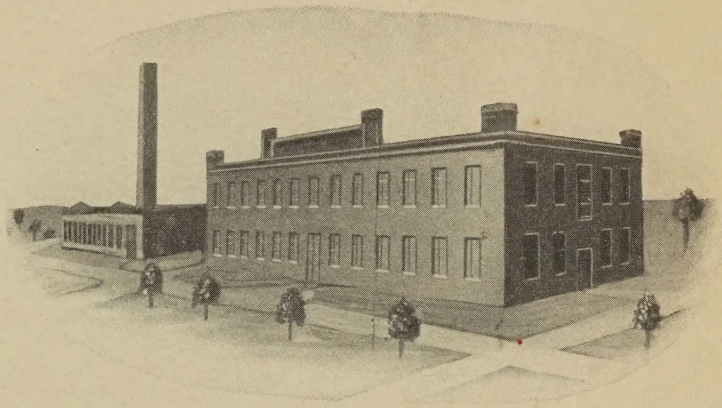
Write for further information.

COLLEGE OF MECHANICAL AND ELECTRICAL ENGINEERING.

CALVIN M. CROUCH, M. S., *Director.*

TO meet the demand in our great and growing state, this college has been started this year.

This college, organized in 1901, has outgrown its quarters in Science Hall and will have its home in the new *Mechanic Arts Building* shown on this page which is a large, well lighted, two story, brick structure containing the wood-working, moulding, forge and machine shops, mechanical laboratory, draughting and lecture rooms which will be devoted exclusively to the needs of this college. The building will be completed, ready for occupancy September 1st.



MECHANICAL BUILDING.

The various shops, mechanical laboratory and dynamo laboratory (situated in Science Hall) will be thoroughly equipped with the *latest, up to date equipment*, making them *second to none* west of Chicago thus enabling the various departments to give the highest grade of instruction.

A First-class Technical Education can now be obtained within the borders of North Dakota for such is given at the *State University of North Dakota* where the courses are planned to lay a good foundation for a successful engineering career, fitting the graduates for superintendents, master-mechanics and managers of engineering enterprises.

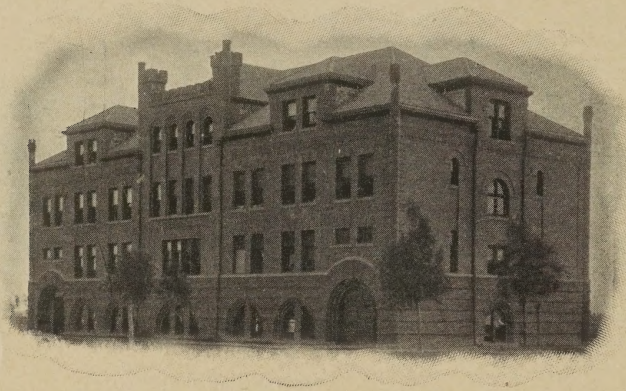
Special students will be allowed to take any work for which they are prepared.

The degrees of Bachelor of Mechanical Engineering, or Bachelor of Electrical Engineering, will be conferred upon those who successfully pursue one of the courses given. *Write for catalogue.*

THE NORMAL COLLEGE.

JOSEPH KENNEDY, M. A., *Dean.*

The Normal College is fortunate in having secured the services of Mrs. Alice W. Cooley, recently supervisor of primary work in the Minneapolis schools and a woman of national reputation in educational circles.



BUDGE HALL.

THE NORMAL COLLEGE offers superior advantages to those desiring to fit themselves for teaching.

Normal Diploma.

To those completing the course the Normal Diploma is awarded, and becomes a state certificate. Students in the Normal department have the advantage of spending a few years in college halls, and of using the University laboratories and library, the finest in the state.

A Broad and Deep Course.

It will take you a year longer to graduate from the Normal College than it would from most Normal Schools; but if you can not graduate, it pays as it goes. If you can graduate you are so much the better fitted for the profession and for life. The broader and deeper course is always the better in the end.

Winter School for Teachers.

A winter School for teachers is offered during the second term, beginning the first week in January. All the courses offered in the summer school, and more, are given. Come and spend a term at the University for a good review or for new work.

For further information, send for catalogue.

THE COLLEGE OF LAW.

HON. GUY C. H. CORLISS, *Dean.*

The State University offers the very best facilities to those contemplating the study of law.

The Faculty.

The faculty consists of eleven regular instructors and lecturers and six special lecturers. Hon. Guy C. H. Corliss, formerly Chief Justice of the state, is dean. Andrew A. Bruce, recently Professor of Law and Assistant dean of the Law School of the University of Wisconsin, is Professor of Law and secretary of the faculty. Few schools in the country have an abler law faculty.

Graduates Admitted to the Bar Without Examination.

The diploma of the College of Law admits its holder without further examination to practice in all the courts of the state and carries with it the degree of Bachelor of Laws.

Length of Course.

The course covers only two years but the College is in session six days each week for thirty-six weeks and covers as much ground and covers it as thoroughly as other schools do in three years. The North Dakota Law School offers the best possible training for North Dakota lawyers. It is the only school in the country in which the North Dakota code is used as the basis of instruction.

Quarters.

Upon the opening of the fall term the College of Law will occupy new quarters in the office building now in process of erection on DeMers Avenue. This will be, when completed, the finest building in the state and one of the finest in the northwest. The new quarters will consist of spacious lecture rooms, a fine library and reading room, private offices, etc. The new building will be centrally located and will be largely occupied by lawyers' offices, so that some of the best law libraries in the state will be within easy access of the students of the law school. The College itself has an excellent library to which additions are constantly being made.

Expense.

The total expenses for the year, including the tuition fee of fifty dollars, need not exceed two hundred dollars. Where else can a North Dakota young man secure as good a legal training for as little money.

For further information, send for catalogue.

THE SCHOOL OF COMMERCE.

WM. M. BRYANT, M. ACCT., *Principal.*

A VIEW IN THE LIBRARY.

DO you want to learn to do business in a business-like way? Do you wish to fit yourself to be an expert stenographer, typewriter, bookkeeper or accountant? If so, you should attend the School of Commerce at the State University.

The Age Demands Careful Preparation.

The demands of a business life are every day becoming more exacting. To succeed, a young man or woman needs preparation. To meet this demand a great many private commercial schools have sprung up. But lately many of the leading colleges have been establishing departments of commerce. Your State University is not behind in this respect. A new School of Commerce in which are offered the very best facilities in all business lines has been established. NO TUITION IS CHARGED, BUT THE INSTRUCTION IS THE VERY BEST OBTAINABLE.

Time Required.

If you are a High School Graduate, you can probably finish the full course in one year. If you wish to learn merely Bookkeeping, Stenography and Typewriting, you can master these satisfactorily in one year.

For further information, send for catalogue.

THE PREPARATORY DEPARTMENT.

PURPOSE of the School.

As the name indicates, the Preparatory Department prepares for the colleges. It is maintained for the benefit of those who have no High School privileges at home. If there is a High School in your town, don't think of going anywhere else, until you have completed the course there offered. But if there is no High School and you want an education, plan to enter the Preparatory Department of the University.

THE COTTAGE—YOUNG WOMEN'S DORMITORY.

Requirements for Admission.

To enter, you will have to pass examinations in Arithmetic, Grammar, Geography, U. S. History, Physiology and Civics, unless you have certificates from the High School Board in these subjects.

Time Required.

The course in this department requires three full years for its completion. This is a year longer than some (so-called) preparatory courses; but this is because the course is up to the eastern standard, while the short-cut courses are not, as is evident from the very fact that they require a shorter time.

Expense.

In all the departments, except Law, the tuition is free; room rent, including heat and light, hot and cold water, is seventy-five cents per week; table board, $2.75 per week. How could it be less?

For further information, send for catalogue.

DAVIS HALL—YOUNG WOMEN'S DORMITORY.

DAVIS HALL, where most of the young ladies live, is a commodious building, containing a spacious dining hall, a beautiful parlor and a large number of attractive rooms. It makes a delightful College home. And where else in the world can you get a comfortable room, heated by steam, lighted by electricity, with privilege of baths, laundry, and parlor, all for seventy-five cents a week.

The Best Education Now Offered at Home.

Heretofore, young men and young women desiring to secure superior advantages in these departments have been obliged to go east. That will no longer be necessary. The opportunity is now offered at home. The expense will be only a small fraction of what it would be at the great eastern technical schools; but it will be the aim to make the course just as thorough and valuable.

Questions and Answers.

1. How much will it cost me to attend the University a year? This depends in great measure on yourself, but the following will give you some idea:

Incidental fee	$ 5.00
Deposit fee (part returned)	3.00
Board and room (35 weeks)	122.50
Books and supplies, about	15.00
Total	$145.50

Besides this, there will be your railroad fare and your washing, (the young ladies have free use of the laundry) and such other expenses as your taste demands.

2. Who can enter? Anyone who has completed Arithmetic, Grammar, Geography, U. S. History, Physiology and Civics can enter the Preparatory, Normal or Commercial Departments by presenting High School Certificates in these subjects, a second grade teacher's certificate, or by passing an entrance examination.

Anyone who has completed a course equivalent to that offered by a first-class State High School can enter any of the College departments.

Anyone who has partially completed a High School course will be given due credit for what he has done, and assigned to his proper place.

A STUDY IN BUDGE HALL.

3. When can I enter? You can enter at any time; but to enter any class after the work is well begun involves a student in many embarrassments. A hard student can often make up the work he has lost; but it is always difficult. Therefore, if possible, plan to enter at the beginning of the year or term. For late registration, an extra fee of one dollar is charged. The regular enrollment for the fall term takes place September 23, 1902.

4. Can I choose my own studies and take just what I wish? Yes—that is, you can do so with a few limitations. If you wish to take a full course in any department, certain studies are prescribed, though in every department there is considerable opportunity for choice. If, however, you wish to take a special course pursuing studies along some particular line, you may do so, taking any work for which you are prepared. For example, if you wish to take up Stenography and Typewriting, but don't care for Commercial Arithmetic or Bookkeeping, you may do so. Of course you ought to take a complete course in the department in which you enroll; but if you cannot do this, you are allowed to take what you feel you need most.

PARLOR IN DAVIS HALL.

5. What is furnished in the Dormitory rooms? A bed, chairs, tables, and book cases are provided in each room. Each student needs to furnish his own bedding, towels, and such decorations in the way of pictures, curtains and the like as his taste suggests.

6. How about the social life of the University? The young people at the University have a very pleasant time. Every week there is a reception in the large parlor in Davis Hall. There are also occasional gatherings of a more formal character, sometimes in Davis Hall, sometimes in the Armory. There are occasional lectures by prominent speakers. The literary societies give open entertainments. The different classes have their annual banquets. During every winter there are entertainments of a high character in the City of Grand Forks. Altogether there is abundant opportunity for a pleasant and profitable social life.

7. Religious life at the University. Naturally the University cannot be sectarian; but the faculty is made up entirely of Christian men and women. There is a Young Men's Christian Association, and a Young Woman's Christian Association. A religious service is held in the college chapel every morning, and a longer one in the parlor every Sunday evening. Besides these, a prayer meeting is held in one building or the other almost every night during the college year.

The University omnibuses run into town every Sunday to accommodate those desiring to attend church in the city. All the Grand Forks churches and pastors take a warm interest in the University and the students. No one can say that the religious element is not encouraged at the State University.

A ROOM IN DAVIS HALL.

8. Physical training at the University. The young men have military drill two times a week through the preparatory course and through the first years of the college course. The work is directed by an army officer, who is a graduate of West Point.

The young women are instructed in physical culture three times a week by a specially trained teacher. They use the drill hall in the Armory, and have ample room for carefully selected and varied exercises.

In addition to the regular drills, base ball, foot ball, basket ball, and tennis, and in the winter, safe skating rinks, made by flooding portions of the campus, afford excellent opportunities for vigorous outdoor exercise.

The attitude of the University is favorable to the use and control of athletics. She believes in athletics used, not abused. She knows that vigorous, clean sport contributes to healthy bodies and minds, and therefore is a large factor in developing high types of morality among her youth.

A COSY CORNER IN DAVIS HALL.

9. How can I reach the University? If you are on the Great Northern railroad, buy a ticket and get your trunk checked direct to the University. All Great Northern trains, except the "Coast Train," stop at the University. If you do not live on the Great Northern railway, proceed to Grand Forks and then come out to the University by the Great Northern or by private conveyance.

10. Where ought a North Dakota boy or girl go for the very best education? To the State University, the leading educational institution in the state, founded and supported by North Dakotans for North Dakotans.
